Dismantling Joints

Dismantling Joints

Flanges according to DIN 1092-2 (DIN 2501)

Size: DN 100 - DN 1600 mm

Pressure rating: PN 6 - PN 40 bars

Features:

By using these joints, valves could easily be installed, removed/dismantled from the pipeline. By turning the bolts the length of the dismantling Joints can be reduced allowing enough space for removing the valve and sealing washers from the pipeline. For installing the valves and sealing washers, the length of dismantling joints can be adjusted by the adjusting bolts and therefore fastening the valve tightly to the pipe flanges.

Coating:

All parts are coated with electrostatic epoxy powder.

Range of application:

For media with minimum temperature of 50°C (for other temperatures as per request).

Advantages:

- Reliable design
- Low space requirement
- Compensates pipe length error
- Discharges radial and axial forces to the valve

Part No.	Part name	Material	Spare Part
1	Inner pipe & flange	St 37-2	
2	Middle flange	St 37-2	
3	Seal	NBR	●
4	Outer pipe & flange	St 37-2	
5	Stud	Galvanized Steel	●
6	Washer	Galvanized Steel	●
7	Nut	Galvanized Steel	●
